RESTRICTION/ELECTION

Dear Sir:

Responsive to the Office Action mailed 09/24/01, Applicant provides the following remarks towards the Examiner's notice of Restriction.

REMARKS

The Examiner has stated that claims 1-27 are generic to a plurality of disclosed patentably distinct species comprising a stimulus sensitive gel. Applicant believes that the Examiner does not mean to say that claims 1-27 are generic, since that is the entire claim set as currently pending. Applicant believes that the Examiner meant to state that currently claim 1 is generic. More particular, the Examiner states that claim 1 reads on any possible stimulus sensitive gelling polymer and an insoluble or confined radioisotope.
